

CLAIMS

- Sub B1
ent
1. An article comprising a first element and a second element being joined to said first element by means of an adhesive characterized in that said adhesive comprises a polyolefinic homopolymer having an isotacticity of less than 60% of [mmmm] pentad concentration.
 2. An article according to claim 1 wherein said homopolymer has a molecular weight of at least 100000g/mol.
 3. An article according to Claim 1 wherein said adhesive is stretchable.
 4. An article according to Claim 2 wherein said adhesive is elastically expandable.
 - Sum A1
5. A polymeric adhesive according to any of the preceding claims wherein said homopolymer is polypropylene.
 6. An article comprising according to any of the preceding claims wherein said adhesive is deployed as a construction element.

- Sub B*
7. A method for providing an adhesive coating comprising a step of applying an adhesive coating selected from the group of hot melt, spray, powder melt, extruded bead, liquid, solvent based, pressure sensitive, and combinations thereof characterized in that said polymeric material comprises a polyolefinic homopolymer having an isotacticity of less than 60% of [mmmm] pentad concentration.
